Spices

Indian Spices – A Legacy of Purity, Aroma & Flavor

India, the land of spices, has been renowned for its rich, aromatic, and high-quality spices for centuries. Indian spices are known for their distinctive flavors, medicinal properties, and unmatched quality, making them a preferred choice worldwide. The unique climatic conditions, traditional farming methods, and advanced processing techniques ensure that Indian spices retain their natural oils, freshness, and potency.

At **GROW INDIA NATURALS**, we take pride in Cultivating, Supplying & Exporting the finest quality whole spices and ground (powdered) spices to global markets.

Our spices are:

- ✓ **Grown with Care** – We cultivate a variety of spices on our own farms using natural and sustainable practices.
- ✓ **Sourced from Trusted Farmers** – Some of our spices are directly procured from experienced farmers, ensuring freshness and authenticity.
- ✓ **Uncompromised Quality** – Every batch undergoes rigorous quality checks to maintain purity, aroma, and essential oil content.
- ✓ **Hygienically Processed & Packed** – Our spices are carefully cleaned, sorted, and processed to retain their natural essence and extend shelf life.

Our Product Range –

- ☞ **Whole Spices**
- ☞ **Coarse Grinded**
- ☞ **Powder**

Millets

Indian Millets – A Superfood for Health & Sustainability

India is a leading producer of high-quality millets, known for their nutritional richness, resilience, and eco-friendly cultivation. Indian millets are packed with essential nutrients, dietary fiber, and antioxidants, making them a superfood for a healthy lifestyle. Due to ideal climatic conditions and traditional farming methods, Indian millets have better taste, texture, and higher nutritional value compared to others.

At **GROW INDIA NATURALS**, we specialize in Cultivating, Supplying & Exporting premium whole millets to global markets.

Our Millets are:

- ✓ **Grown with Care** – We cultivate a variety of millets on our own farms using sustainable and natural practices.
- ✓ **Sourced from Trusted Farmers** – Some millets are directly procured from experienced farmers, ensuring freshness and authenticity.
- ✓ **Uncompromised Quality** – Our millets undergo strict quality checks to maintain purity, taste, and nutritional integrity.
- ✓ **Hygienically Processed & Packed** – Carefully cleaned, sorted, and packed to retain natural goodness and long shelf life.

Our Product Range –

- ☞ **Whole Millets**
- ☞ **Flour**

Vegetables Oil

Indian Oil Seeds – Rich, Pure & Naturally Sourced

India is one of the leading producers of high-quality oil seeds, known for their rich oil content, purity, and nutritional value. Indian oil seeds stand out due to favorable climatic conditions, traditional farming practices, and advanced processing methods, ensuring superior quality and high yield. These seeds are widely used for oil extraction, culinary applications, and health benefits.

At **GROW INDIA NATURALS**, we take pride in Cultivating, Supplying & Exporting premium whole oil seeds and their extracted oils to global markets.

Our Seeds are:

- ✓ **Grown with Care** – We cultivate select oil seeds on our own farms using sustainable farming practices.
- ✓ **Sourced from Trusted Farmers** – Some seeds are directly procured from experienced farmers, ensuring freshness and authenticity.
- ✓ **Uncompromised Quality** – Our oil seeds undergo strict quality control to maintain purity, aroma, and high oil content.
- ✓ **Hygienically Processed & Packed** – Seeds and oils are carefully cleaned, processed, and packed to retain natural nutrients and freshness.

Legumes

Indian Legumes – Pure, Nutritious & Naturally Protein-Rich

India is the largest producer and exporter of Legumes, known for their superior taste, high protein content, and rich nutritional value. Thanks to fertile soil, ideal climate, and traditional farming techniques, Indian Legumes are naturally flavorful, chemical-free, and packed with essential nutrients like protein, fiber, and minerals. Their superior texture and purity make them highly sought-after in global markets.

At **GROW INDIA NATURALS**, we specialize in Cultivating, Supplying & Exporting premium whole & Split Legumes, ensuring top-quality and freshness in every batch.

Our Legumes Are :

- ✓ **Farm-Grown & Naturally Cultivated** – We grow select Legumes on our own farms using sustainable agricultural practices.
- ✓ **Sourced from Trusted Farmers** – Some Legumes are directly procured from experienced farmers, ensuring authenticity and purity.
- ✓ **Superior Quality Standards** – Every batch is carefully cleaned, sorted, and quality-checked to meet global export standards.
- ✓ **Hygienic Processing & Packaging** – Our Legumes retain their natural taste, freshness, and nutrients for a longer shelf life.

Our Product Range – 🍲 **Whole Legumes**

Quality Assurance

We have a formalised system of four stages to carefully Cultivate & Export all our products to complement the needs of our clients.

When We Purchase

Stage 1 - Farm visits

The process of quality check starts right from the farm. We have a dedicated team that goes on farm visits throughout India and interacts with farmers to obtain their opinions on the quality of soil and suitable weather conditions for new crops.

Stage 2 - Raw material acquisition

The second stage involves the procurement of raw materials. All basic materials are acquired with immense care from either the market or directly from the farmers.

Stage 3 - Processing and packaging

Next, we have a team of specialists wholly for processing, packing and loading. Throughout the procedure we are extremely alert to make sure no extraneous matter are spotted in our cargo.

Stage 4 - Shipping

Finally, for the shipping process we use third party certification and also in house checklists to inspect every container we use to ship the cargo. All containers are thoroughly checked to meet the food safety standards before transportation.

When We Cultivate

Stage 1 - Soil Preparation & Sowing

We test and improve soil using organic fertilizers, then plow it for sowing. High-yield, disease-resistant seeds are planted at the right depth and spacing.

Stage 2 - Crop Management & Growth

Crops are irrigated using drip, sprinkler, or flood methods. Weeds are removed manually, and organic pesticides are used. Natural fertilizers like cow dung manure and neem cake enhance growth.

Stage 3 - Harvesting & Sorting

Crops are harvested manually or mechanically at peak maturity. High-quality produce is sorted and graded for export.

Stage 4 - Cleaning, Packaging & Storage

Harvested crops are cleaned, sun-dried if needed, and packed in moisture-proof, export-grade bags. They are stored in temperature-controlled warehouses until shipping.

“Quality

At Grow India Naturals, quality is our top priority. We are committed to 100% natural and organic standards, ensuring that every product meets the highest quality benchmarks. To maintain this, we conduct regular lab tests and obtain necessary certifications for all our shipments. Additionally, we offer customized weight and quality reports based on client requirements, providing complete transparency and assurance.
